 - 48" Square, use 300 lbs
- For use with natural gas or propane

Fire Bowl Burner

Fire Pit Burner

Transformer Panel

Burner Assembly

- Patented flame monitoring technology is proven and reliable in adverse weather conditions
- Each unit is factory tested for safety
- Made of high grade stainless steel to prevent corrosion
- Available in natural gas or propane
- Open-top pilot box is required for all fire glass media applications
- CSA approved

Transformer Panel

- Required and included with every automated electronic ignition burner assembly
- Easy to install
- Compatible with any pool operating systems

Automated Electronic Ignition

- UL control module

Mounting Brackets and Support Plates

- Mounting brackets and hardware are designed to resist corrosion
- High precision, laser cut hardware ensures a secure and stable installation
- Designed to be breathable and to prevent overheating – open ventilation allows for a richer and cleaner flame
- The media support plate is custom designed to provide a secure and stable flame bed
